

up to **6x** range¹
14x speed¹

Wireless range and speed rates are D-Link RELATIVE performance measurements based on the wireless range and speed rates of a standard Wireless G product from D-Link.

Xtreme N™ GIGABIT ROUTER

Superior Performance Over
Competing Draft N Routers

Backward Compatible With 802.11g and
802.11b Devices

Intelligent QoS Technology

BEST-IN-CLASS FEATURES

The D-Link DIR-655 Xtreme N™ Gigabit Router is a draft 802.11n compliant device that delivers up to 14x faster speeds¹ and 6x farther range¹ than 802.11g while staying backward compatible with 802.11g and 802.11b devices. Connect the Xtreme N™ Gigabit Router to a cable or DSL modem and provide high-speed Internet access to multiple computers, game consoles, and media players. Create a secure wireless network to share photos, files, music, videos, printers, and network storage. Powered by Xtreme N™ technology and equipped with three external antennas, this router provides superior wireless coverage for larger homes and offices, or for users running bandwidth-intensive applications. The DIR-655 also includes a 4-port 10/100/1000 Gigabit switch that connects Gigabit wired devices for lag-free network gaming and faster file transfers.

INTELLIGENT QoS ENGINE

With D-Link's Intelligent QoS Technology, wired and wireless traffic are analyzed and separated into multiple data streams. The DIR-655's embedded WISH Stream Engine improves wireless media by moving time-sensitive tagged traffic to the front of the WMM queue and optimizing RF settings for optimal wireless throughput. WISH (Wireless Intelligent Stream Handling) automatically detects multimedia, VoIP and Online Gaming applications, requiring no user configuration. It works transparently with other QoS technologies to immediately improve wireless media speed.

ADVANCED NETWORK SECURITY

The Xtreme N™ Gigabit Router supports the latest wireless security features to help prevent unauthorized access, be it from over a wireless network or the Internet. Support for WEP, WPA, and WPA2 standards ensure that you will be able to use the best possible encryption regardless of your client devices. In addition, this Xtreme N™ Gigabit Router utilizes Dual Active Firewalls (SPI and NAT) to prevent potential attacks from across the Internet.

HARD DRIVE, MULTIFUNCTION PRINTER SHARING, 3G MOBILE INTERNET CONNECTION

Using the SharePort™ Network USB Utility, you can connect an external hard drive or multifunction printer to the router's USB port to share disk space, printing or scanning functions among family members or a group of users. This USB port also supports D-link 3G adapter connection, so you can connect your router to a 3G mobile service to provide Internet access to a group while travelling.

WHAT THIS PRODUCT DOES

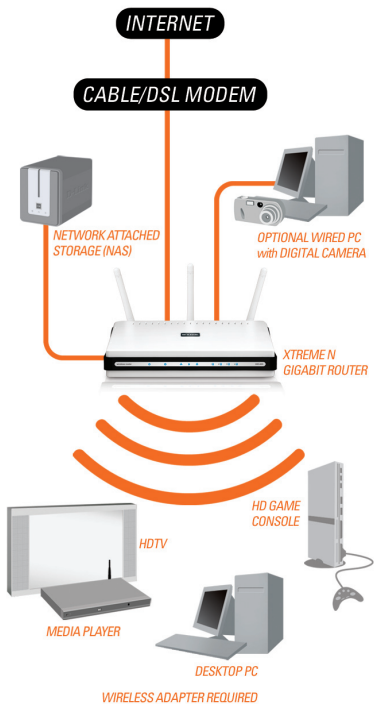

Create a wireless network to share high-speed Internet access with computers, game consoles, or media players from greater distances in your home or office.

XTREME N™ ROUTER BENEFITS

- + Intelligent Wireless Prioritization Technology
- + Xtreme N technology allows for farther home coverage¹
- + Secure your wireless network using advanced WEP, WPA™, or WPA2™ encryption
- + Easy to get started with D-Link's new Quick Router Setup Wizard
- + Supports Good Neighbor Policy – will not interfere with other wireless networks
- + Backward compatible with 802.11g and 802.11b devices including -game consoles and digital media players

¹ Maximum wireless signal rate derived from IEEE standard 802.11g and draft 802.11n specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, buildings materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range. Wireless range and speed rates are D-Link relative performance measurements based on the wireless range and speed rates of a standard Wireless G product from D-Link. Maximum throughput based on D-Link draft 802.11n devices.

² Computer must adhere to Microsoft's recommended System Requirements.

³ The software included with this product is not Mac-compatible.

This product is based on IEEE draft 802.11n specifications and is not guaranteed to be forward compatible with future versions of IEEE 802.11n specifications. Compatibility with draft 802.11n devices from other manufacturers is not guaranteed. All references to speed and range are for comparison purposes only.
